## Frequently missed questions ?

Question

Correct responses

Name the outer most boundary of cell

12 / 26

The \_\_\_\_\_ contains single chromosome and cell division occurs through fission or budding

11 / 26

Which of the following statements are true about Eukaryotes? (a) They are cells with a nucleus. (b) They are found both in humans and multicellular organisms. (c) Endoplasmic reticulum is present in Eukaryotes. (d) They have chemically complexed cell wall.

10 / 26

In most organisms, DNA is a genetic material which stores the information template for the synthesis of RNA and subsequently protein. Name the processes a, b, c represented in the figure:

0 / 26

What is the main enzyme that plays the major role in formation of thymine dimer?

14 / 26 correct responses

Which of the following statements are true about Eukaryotes? (a) They are cells with a nucleus. (b) They are found both in humans and multicellular organisms. (c) Endoplasmic reticulum is present in Eukaryotes. (d) They have chemically complexed cell wall.

10 / 26 correct responses

Dna synthesis, transcription, translation

a- duplication b-transcription c-translation

A- Replication ,B- Transcription,C-Translation

a- duplication b - transcription c-translation

a) Replication, b)Transcription, c)Translation

b. Transcription c. Translation

Replication, transcription and translation

a- duplication b- transcription c-translation

a-replication b-transcription c-translation

DNA helices exist in various form. Which of the following form is predominantly expressed in cells
