Brief Note: An event wherein Third year students presented their projects in form of Poster/ chart paper/ Power point presentations. This is an opportunity for the Third years to display their work and gain experience to present before the audience and answer their random questions put forth to them on their selected topic as well as to know the motivation that lead them to work on that topic. Furthermore it's also a opportunity for the First and Second year students to explore and know about the struggles, efforts and achievements that their seniors have gone through in doing their projects and these experiences provide an idea to the juniors to improvise at their time of preparing projects and posters during their tenure in third year. This process also help the junior students build up contacts with their seniors which can be useful in taking their guidance in future.

	1. Very good. Incorporate guide names in poster				1. Some projects require intense research and to be verified. 2. Should be more interactive.
