Programme Outcomes for MSc IT Programme

The MSc IT Programme aims to develop deep theoretical and practical knowledge of important disciplines like Data Structures, Database Management Systems, Operating Systems and Networks, Software Architectures and Machine Learning. At the end of the programme students should be well equipped to write software programs independent of any particular language or platforms. The students are also imparted soft skills and mathematical skills required by the IT sector, along with other important skills such as conducting research and working in teams. To add to this, the mandatory internship in Software Industry / Research Organization provides the necessary real-world experience to be ready for the Industry as well as academia.
