Title:	Field Trip for S.Y.B.Sc students (<i>Under faculty-Student Exchange programme - MoU</i>)
Date and year:	16/09/2017 - 17/09/2017
Venue:	R.P. Gogate College, Ratnagiri, Maharashtra
Resource person/s:	Faculty of Gogate College
No. of Participants	50
Objective:	To acquaint the students with knowledge of techniques used in genetics.
Summary of the proceedings	Dr. Nandini Vaz Fernandes and Ms. Madhu Balakei accompanied the students of SYBSc of Chowgule college to Gogate College in Ratnagiri Maharashtra on 16 th and 17 th September 2017. They also attended Birdwalk on 17 th September 2017 at ratnagiri.

Title:	Lecture Series
Date and year:	21/07/2017
Venue:	Parvatibai Chowgule College of Arts & Science
Resource person/s:	Mr. Parag Ragnekar, Mr. Mangirish Dharwadkar and Dr. Nandini Vaz Fernandes
No. of Participants	70
Objective:	To acquaint the students with the rich diversity of birds in Goa and the importance of bird research
Summary of the proceedings	<p>The students were exposed to a wide variety of flora and fauna. The following is a sample of organisms that were recorded in the sanctuary</p> <p>Mr. Parag Ragnekar (president of GSBN) applauded the college for having a 'Birders Club'. He delivered a lecture on the activities of GSBN and also stressed on importance of bird research and conservation. Mr. Mangirish Dharwadkar (Forest Department, Wildlife and Ecotourism wing (North) division of Goa) spoke on bird identification and birds of Goa. Dr. Nandini, spoke on 'Birding and Birding etiquettes', emphasizing on the techniques used in bird identification.</p>

Title:	Trip to Fish Processing Industry for T.Y.B.Sc students
Date and year:	09/09/2017
Venue:	Fish packaging unit 'Quality Exports' at Cuncolim, Goa
No. of Participants	55
Objective:	To acquaint the students with the process of fish preservation and packaging.
Summary of the proceedings	<p>The students were shown various processes involved in fish processing and preservation like preparation of raw materials needed for processing and packaging of the final product in a sanitary and hygienic environment. Quality Exporters processes and exports fish. Quality Exports uses different types of refrigerators and containers to store and process fish at different temperatures. The main purpose of the field trip was to expose the students to the various techniques of fish preservation, processing and export.</p> <p>Quality Exports is a fish processing plant owned and managed by Mr. Ibrahim Maulana. It exports a wide variety of fish such as mackerel, ribbon fish, kingfish, shrimp, cuttle fish, squids and other types of sea food to countries such as China and other parts of South East Asia.</p> <p>An employee of the company explained that the first step in fish processing is to preserve the fish as soon as possible in order to maintain its nutritional value, consumption quality and shelf life.</p> <p>Quality Exports uses the refrigeration and freezing technique of preserving fish. Students were acquainted with the area where the fish is first washed, segregated into cartons by weight and then stored in freezers. Several employees organized into assembly lines carry out this process in a hygienic manner.</p> <p>In order to prevent the fish from losing its freshness, it is stored in freezers having temperatures set to -180C and -400C. Students were also given a</p>

view of the same.

Employees wearing insulated clothing load the boxes of frozen fish into refrigerated shipping containers which are later transported to different countries by sea. Students observed the loading process.

Quality Exports possesses an in-house laboratory which is used for conducting microbiological assessments of frozen seafood.

Title:	Inauguration of Butterfly Garden on the campus (Green initiative)
Date and year:	02/10/2017
Venue:	Parvatibai Chowgule College of Arts & Science
Objective:	To create an awareness on the importance of butterflies and to emphasize their role as bio-indicators.
Summary of the proceedings	<p>The college took an initiative of creating a butterfly garden in the campus, which was inaugurated on 2nd October 2017. With prior planning initiated in the month of July 2017, the final execution was completed on 2nd October. Relevance of Butterfly garden in ensuring clean environment are multiple. Besides being pollinators of many plants, they also serve as important part of the food chain. The most important feature is that Butterflies serve as an 'Ecosystem barometer' which that tells us about the health of our environment. These creatures are sensitive to changes in climate, the presence of harmful chemicals, pollution in the air and water, and any other changes in the environment. Presence of many species of butterflies on our campus is an indication that the Chowgule college campus is clean and healthy.</p> <p>The butterfly garden has different host plants planted in it which include both adult and larval feeding plants. The garden also has shelter providing trees and shrubs, water and substitute for nectar. It also has a board displaying the different species of butterflies found on the campus. The students painted iron racks for stacking flower pots and also installed the board. The garden will be maintained by the zoology students under the leadership of Dr. Nandini Vaz Fernandes. .</p> <p>The garden displays the photographs and names of butterflies present in the campus, recorded over a period of 03 years by Dr. Nandini.</p>

Title:	Bird Walk for Swedish Delegates
Date and year:	30/11/2017
Venue:	Maina, Curtorim, Goa
Resource person/s:	Dr. Nandini Vaz Fernandes, CBC coordinators and members
No. of Participants	25
Objective:	To acquaint the Swedish delegates to the rich wetland diversity of birds found in Goa
Summary of the proceedings	<p>The Swedish Delegates were accompanied by the CBC coordinators and core committee members. The bird walk was held in a series of habitats viz. Wetlands, Woodlands, Agricultural areas.</p> <p>The birds that were recorded during the walk are as follows:</p> <ul style="list-style-type: none">• Grey headed swamp hen- A very large bluish-purple gallinule with a red bill and forehead shield and red legs and feet with long toes. The tail is flicked up often, revealing fluffy white “underpants.” Juveniles are duller than adults and lack the red bill and shield. A common inhabitant of marshy, vegetated freshwater bodies such as swamps, rivers, and lakes; usually in small groups. Feeds, often clumsily, at muddy water edges, in reeds, and on floating vegetation. Makes short nasal grunts and croaking sounds.• Oriental Darter- A waterbird with a very long, slender, snakelike neck, and a long, pointed bill. Breeding adults have a shiny black body with silvery-white streaks along the wings, a brownish crown and neck, and a white stripe running from the eye to the side of the neck. Nonbreeding and immature plumage is duller and browner. Frequently seen swimming with only its neck and head visible above the water. Impales fish underwater with its daggerlike bill. Like cormorants, often perches upright on a rock, drying itself with outstretched wings. Seen singly or in small groups in inland or coastal water bodies. Usually silent.• Little Cormorant- A small black ducklike waterbird with a distinctive flattish head and a bill that is sharply hooked at the tip. Smallest of the cormorants found in the region. Breeding adults have white plumes on

the sides of the head. Like all cormorants, frequently seen swimming with its body low in the water, head and neck pointing upward, and suddenly disappearing underwater to catch fish. Often perches upright on a rock, drying itself with outstretched wings. Seen singly or in small groups in inland water bodies.

- Lesser whistling ducks- A small, well proportioned, tree-nesting duck. Pale brown overall with a darker brown crown and nape, warmer chestnut underparts, and chestnut-fringed feathers on the back. Note the nearly indistinguishable orange-yelloweyering and the dark gray bill and legs. Sexes similar; juveniles duller. A gregarious duck found in shallow water bodies with abundant vegetation. Flies with rapid wingbeats on broad dark wings flashing chestnut shoulders and a chestnut rump. Call is a wheezy whistling “seasick-seasick.”
- Oriental magpie robin- A medium-sized robin with a broad white wingbar running from the shoulder to the tip of the wing and white outertail feathers. Males sport black-and-white plumage while the females are grayish brown and white. Juveniles resembles females, but have a scaly head and upperparts. They have a good repertoire of melodious calls and are known to imitate other bird calls. The most commonly heard call is a whistle given at dawn. Most often seen singing from a high exposed perch. These birds are often seen in cultivated areas, woodlands, and gardens.
- Asian open-bill stork- A relatively small stork species with a grayish to white body and black wings and tail with a hint of gloss. The Asian Openbill gets its name from a distinctive gap in the dull grayish yellow bill. Note the pinkish legs. Asian Openbills inhabit wetland habitats including shallow marshes, flooded agricultural fields, and lakes. From a distance they could be confused with herons, but they can be clearly distinguished from herons by their feeding habits—wading slowly through shallow water.
- Wire-tailed swallow- A very distinctive swallow with two long, thin feathers on its outer tail from which it gets its name. It has brilliant glossy blue upperparts and a chestnut forehead and crown that contrasts with clean white underparts. Females and juveniles have shorter tails. Found in grasslands, wetlands, open scrublands, cultivated areas and in Africa often found near water. Typically seen in singles, pairs, or sometimes small flocks.
- Indian Paradise flycatcher- A graceful looking flycatcher, the adult male sport a long ribbonlike tail. The males occur in two color morphs

cinnamon and white. Both color morphs sport a glossy black head with blue ring around the eye, but white morph is entirely white below while the cinnamon morph has cinnamon upperparts and tail, and dirty white underparts. The females are cinnamon above with a grayish throat, a shorter tail, and they lack the male's blue eyering.

- Green bee-eater- A small dainty bee-eater that is intensely green overall with a greenish-blue throat, a thin black throat band, and long central tail feathers. In flight, note the dark edge along the lower border of the wings. Juveniles are duller than adults and lack the long tail feathers. In some parts of its range, birds may have a rusty crown or a bright blue throat.
- Blue-tailed Bee eaters- Elegant, slender bird of open country, frequently seen in flight or perched on exposed snags or telephone wires. Adult green overall, with blue tail, thin black mask, and rufous throat; bright rufous underwings visible in flight. Juvenile similar but paler, with tannish throat and shorter tail, lacking the adult's elongated central tail feathers.
- Indian Grey Hornbills- They are about 24 inches long. The upperparts are greyish brown and there is a slight trace of a pale supercilium. The ear coverts are darker. The flight feathers of the wing are dark brown and whitish tipped. The tail has a white tip and a dark subterminal band.
- Zitting cisticola- Very small, with distinctive short, rounded tail with conspicuous terminal spots. Body sandy-colored below, streaky above. Breeding males have a dark bill and crown. Found in open grasslands, meadows, and agricultural areas. Most often seen high in the sky uttering its monotonous and repetitive "tchip...tchip....tchip..." song in undulating song flight.
- Cotton pygmy goose- Tiny duck. Male has bright white head and neck with dark crown and eye. Female is plainer with a strong dark eye-line that does not continue back to the nape. In flight, females have thin white edges on the trailing edge of the wings, while males have big white slashes on the wings. Usually seen swimming in freshwater wetlands, including small ponds and farm dams, especially those with extensive floating vegetation.

Title:	Field Trip for T.Y.B.Sc students
Date and year:	17/09/2017
Venue:	Netravali Wildlife Sanctuary, Canacona, Goa
Resource person/s:	Departmental faculty
No. of Participants	65
Objective:	To acquaint the students with the rich diversity of flora and fauna present in Goa's protected areas
Summary of the proceedings	<p>Students identified total of 11 species of butterflies. Other invertebrate and vertebrate species were also recorded such as the ground skimmer, Python, Malabar giant squirrel and deers.</p> <p>Netravali Wildlife Sanctuary is a major attraction for nature-enthusiasts, wildlife lovers as well as perfect for that relaxing yet adventurous short break. Netravali Wildlife Sanctuary is very popular forest reserve in Goa among the wildlife lovers. Netravali has been declared a wildlife sanctuary by the Government of Goa to protect its Western Ghats range. Netravali is connected to the Madei Wildlife Sanctuary and together the two parks cover an area of 420 km², of which Netravali has 211.05 km² area, supporting a very rich and a varied variety of wildlife. Netravali Wildlife Sanctuary lies between the Bhagwan Mahavir Wildlife Sanctuary to its north and Cotigao Wildlife Sanctuary to its south.</p> <p>Be prepared for an abundance of nature and thick dense forestation along your drive. Netravali has gained a reputation for its stunning forestation and diverse wildlife. You will also see a high range of mountains here which the local habitants consider religious and which are of socio cultural importance to them. You will come across a number of exotic birds and some animals. Some of the wildlife found here are the great pied hornbills, black panthers, slender loris, king cobras and the giant squirrels. Also a number of many other animals are found. Do stop at the charming and aptly named Bubble Pond. Kids will love this quaint water feature. The Netravali Wildlife Sanctuary is an extremely significant source of fresh water and known to be named after the Netravali which is an important tributary of the Zuari River.</p>

Title:	Installation of Bird Houses - Green Initiative
Date and year:	13/02/2018
Venue:	Parvatibai Chowgule College of Arts & Science
Resource person/s:	CBC coordinators
No. of Participants	25
Objective:	Installation of bird houses in the college campus
Summary of the proceedings	<p>Bird houses were installed at various locations on the college campus, to provide shelter for small birds and encourage them to inhabit the campus niches. The student members of birders club installed the birdhouses, which housed soft natural material bedding and will serve as resting sites for birds. The birds that visit your backyard are a part of the whole ecosystem. The Importance of birdhouses can't be understated if you want to attract birds to your yard. Having a home for your feathered friends adds some interest to your yard and makes sure the birds will keep visiting. There are also many other bird house benefits, as well</p> <p>Bird Houses are often called nesting boxes because they provide a safe place for birds to build their nests, protected from the elements and predators. In the winter months, they give visiting birds a place to snuggle together for warmth away from the cold air.</p> <ul style="list-style-type: none">• Controlling pests. Since birds eat insects, they will help to eliminate unwanted pests in your yard and free you from needing to use otherwise harmful pesticides.• Weed control. Birds love to eat weed seeds. Gardeners do not like to weed. A Win win situation for all!• Flower pollination. There are many birds who love to sip nectar from flowers and help to pollinate. With the bee population diminishing, attracting birds who do this is sure to benefit your garden.• Conservation. Birds love native plants. If you grow these and then attract birds to your yard with bird friendly birdhouses, you will find that your gardening chores will diminish.• Property Values. A well maintained home with native landscaping that attracts birds has great curb appeal, which helps with property values.

Title:	Bird Walk
Date and year:	09/08/2017
Venue:	Borim, Goa
Resource person/s:	CBC coordinators and members
No. of Participants	30
Objective:	The students were introduced to birding in the field and bird survey methodology
Summary of the proceedings	<p>Preliminary survey of the birds at Borim was conducted by Reuben and Dheeraj. A total of 22 species of birds were observed. The most remarkable sighting was of the collared kingfisher and the night heron. Some of the birds observed are listed below.</p> <ul style="list-style-type: none">• Collared kingfisher- A mid-sized kingfisher with a variable plumage pattern; nearly 50 subspecies described worldwide. All of them have a greenish-blue crown, a white spot above the lores, a black mask extending down as a narrow band across the hindneck, and a white collar. Upperparts are greenish-blue, rump brighter blue, with blue wings and tail and white underparts. Female and juvenile slightly duller.• Night heron- Stocky heron with neck usually tucked in. Adults overall pale grayish with black cap and back. Red eyes. Juveniles noticeably different, brown and streaky with yellow eyes. Often crouched under overhanging branches during the day. Feeds nocturnally for fish, frogs and other prey. Where it overlaps with Yellow-crowned Night-Heron, note large teardrop-shaped white spots on wing coverts which Yellow-crowned lacks.

- **Purple Heron**– large heron with rusty head and streaky neck. Has purple brown plumage with slate grey wings, reddish brown breast, black belly and reddish-purple flanks and scapulars.
- **Green Bee Eater**– A small dainty bee eater that is intensely green overall with a greenish blue throat, a thin black throat band, and long central tail feathers. Flies gracefully as it catches insects and other prey.
- **Ashy Prinia**– It is a small warbler. It has a black bill, pale cinnamon underparts, a gray head, and a greyish brown back. Nonbreeding birds acquire a short eyebrow and a longer tail.
- **Common Kingfisher**– small and often shy, and inconspicuous. Has turquoise green upperparts with brighter turquoise rump. Tail is blue. Wings are darker blue, finely spotted with turquoise on greater coverts. The underparts are rufous orange slightly darker on flanks. On the head crown and malar stripe are blue, finely spotted with paler blue and black.

Report on "Screening of Social Documentary"

Title:	Screening of Social Documentary under Vachan Mandir Programme :late Ravindra Kelekar, a Dyanpeeth Awardee Konkani Writer
Date and year:	2017-18
Venue:	Parvatibai Chowgule College
Resource person/s:	.Producer of the film Smt. Jyoti Kunkolienkar, and the writer Dr. Harishchandra Nagvenkar Smt. Jyoti Kunkolienkar
No. of Participants	60
Summary of the proceedings	The Department organized 'Vachan Mandir' program on 29 th July, 2017 at 2:00p.m. in the Lower Auditorium of the College. A documentary film was screened based on late Ravindra Kelekar, a Dyanpeeth Awardee Konkani Writer at 2:00p.m. (30 minutes). It was followed by an informal discussion. Producer of the film Smt. Jyoti Kunkolienkar, and the writer Dr. Harishchandra Nagvenkar were present for the function. Dr.Nagvenkar appreciated the effort taken by the Department in organizing such a meaningful activity. In the interactive session with Smt. Jyoti Kunkolienkar students were enlightened about the life and contribution of Ravindra Kelekar.

Title:	Community Outreach Activities
Date and year:	05/04/2018 - 14/04/2018
Venue:	Gogol, Navelim, Davorlim, Quepem and Mangor Hill Vasco
Teachers guiding	Dr. Nandini Vaz Fernandes, Ms. Madhu Balekai, Ms. Tessa Vaz, Ms. Andrea D'Souza and Ms. Ashneha.
No. of Participants	55 students
Objective:	To create awareness about health issues and environment
Summary of the proceedings	<p>The department of Zoology conducted various awareness programmes related to health and environment as departmental social responsibility towards the community of Raia, Gogol, Navelim, Davorlim, Quepem and Mangor Hill Vasco. For each activity at least 60 houses were targeted. The activities were conducted by TYBSc students under the guidance of Dr. Nandini, Ms. Madhu, Ms. Tessa, Ms. Andrea and Ms. Ashneha. Various outreach activities conducted were:</p> <ul style="list-style-type: none">• Blood Donation- Blood donation is a voluntary procedure that can help save the lives of others. There are several types of blood donation, which help meet different medical needs.• Kitchen Waste Management and Compost- Composting is one of the simplest ways of contributing positively to waste management, and one you can easily do at home.• Vitamin D Deficiency- Vitamin D deficiency can lead to a loss of bone density, which can contribute to osteoporosis and fractures (broken bones). Severe vitamin D deficiency can also lead to other diseases. In children, it can cause rickets. Rickets is a rare disease that causes the bones to become soft and bend.• Nutrition Requirement of Children- Nutrition for kids is based on the same principles as nutrition for adults. Everyone needs the same types of nutrients — such as vitamins,

minerals, carbohydrates, protein and fat. Children, however, need different amounts of specific nutrients at different ages.

- **Sanitary Hygiene**-Sanitation is the effective use of tools and actions that keep our environment healthy. These include latrines or toilets to manage waste, food preparation, washing stations, effective drainage and other such mechanisms. Hygiene is a set of personal practices that contribute to good health.
- **Garbage Segregation**-Waste segregation" means dividing waste into dry and wet. Dry waste includes wood and related products, metals and glass. Wet waste typically refers to organic waste usually generated by eating establishments and are heavy in weight due to dampness.
- **Importance of Immunization**-Getting immunized is important for at least two reasons: to protect yourself and to protect those around you. Vaccines are the best way we have to prevent infectious disease. A successful immunization program depends on the co-operation of every person.

Dear Sir/Madam,

Dear Sir / Madam,

The District Committee (South Goa) under the chairperson of Smt. Anjali Sehrawat, IAS, Collector & District Magistrate, South Goa has decided to implement the "RASHTRIYA VAYOSHRI YOJANA", scheme for providing Physical Aids and Assisted living Devices such as walking sticks, Elbow crutches/ Auxillary crutches, Walker, Tripods / Quad pods, Hearing Aids, Wheelchair, Artificial Dentures & Spectacles to senior citizens belonging to BPL/Priority Household Ration Card Holders Category.

The Deputy Director, Directorate of Sports and Youth Affairs, and NSS Coordinator, Goa University are required to provide sufficient number of NSS volunteers support to assist in this noble cause.

The District Committee (South Goa) has identified 07 beneficiary Blocks (talukas) in this regard, namely: Canacona, Sanguem, Quepem, Salcete, Ponda, Mormugao and Dharbandora.

A meeting of NSS Programme officers of Colleges from above seven blocks was scheduled on 14th September, 2017, at 4.00 p.m. at Mathany Saldanha Administrative Complex, conference room no. 438 on 4th floor to discuss about the implementation of the upcoming assessment camp. The NSS units of colleges in the respective talukas are required to provide requisite no. of nss volunteers duly accompanied by their NSS Programme officers as discussed in the above meeting.

The Assessment camp in Salcete Taluka will be held at E.S.II Margao, on 21/09/2017 between 8.30 a.m. to 5.00 p.m.

Hence, it is my humble request to you, to depute requisite no. of NSS volunteers and also depute the NSS Programme officers of your institution to accompany, supervise and guide the volunteers who will be participating in the Assessment Camp.

Regards

Madam,

Kindly find the list of volunteers for salcete taluka.

As per your sms received today morning i have asked the NSS POs to reduce the no. of nss volunteers upto 30.

They have assured to do needful.

Due to delay from CES College I could not send the list earlier wherein they sent the volunteers without contact no.s.

I have asked them to resend the same.

They have sent it around 1.35 pm.

Today i also had to attend the meeting as member secretary of NSS Advisory of Goa University in the afternoon.

Hence it is my humble request to you to consider the list.

चौगुले महाविद्यालयात औषधी वनस्पतीचे प्रदर्शन

प्रतिनिधी
फालोर्ड

गोवा शासनाच्या वन विभागातर्फे गोव्यातील ३७ शाळांच्या अवारात १०० चौ. मिटर जागेत औषधी वनस्पतीची बाग करण्याचा उपक्रम राबविण्यात आला आहे. यासाठी वनखात्यातर्फे रोपटी, बियाणे व २५००० रुपये देण्यात आले. शिवाय बागेची देखरेख करण्यासाठी सलग तीन वर्षे ७००० रुपये देण्यात येतात. यंदा २५ शाळांमध्ये हा उपक्रम राबविण्याचा विचार आहे. लोकांमध्ये औषधी वनस्पतीची जागृती व्हावी म्हणून प्रदर्शन भरविण्यात आले आहे, अशी माहिती मडगाव वन विभागाच्या आर. एफ. ऑ. क्लीफा डिसोझा यांनी पार्वतीबाई चौगुले महाविद्यालयात प्रदर्शनाच्या उद्घाटन प्रसंगी दिली.

चौगुले महाविद्यालयाच्या वनस्पतीशास्त्र विभाग आणि गोवा शासनाच्या वन विभागातर्फे औषधी

मडगाव : विद्यार्थ्यांना औषधी वनस्पतीची माहिती देताना स्वयंसेवक तथा विद्यार्थ्यांनी.

वनस्पतीचे प्रदर्शन आयोजित करण्यात आले होते. यावेळी फॉरेस्ट गार्ड अशोक वेळीप, अवधुत कारापूरकर, वनस्पतीशास्त्र विभाग प्रमुख डॉ. संगीता साखळकर, प्रो. अमिषा शिरोडकर पेडणेकर, प्रो. दिव्या

रिवणकर वाळके, प्रो. जेनिस ग्रासियस होते.

सुरुवातीला डॉ. संगीता साखळकर यांनी स्वागत व प्रास्ताविक केले. प्रो. दिव्या वाळके यांनी प्रदर्शनाची माहिती प्रत्येकी वन पिढीला निसर्गाने दिलेल्या औषधी वनस्पतीचे ज्ञान व्हावे यासाठी प्रदर्शन खूपच उपयोगी पडेल, असे त्या म्हणाल्या. यावेळी ५०० रोपट्यांचे वितरण करण्यात आले. प्रदर्शनात शतावरी, कापूर, नागकेशर, धूप, आवळा, तुळशी, पुदीना, ओवा, कडपता, मानपत्री, जायफळ, पिपरी, मिरी, ब्राम्ही अशी ३५ प्रकारच्या वनस्पती प्रदर्शनात ठेवल्या होत्या. प्रदर्शनाला उत्तम प्रतिसाद लाभला. मडगाव शहरातील १० विद्यालये आणि ५ उच्च माध्यमिक विद्यालयांच्या विद्यार्थ्यांनी तसेच इतर नागरिकांनी प्रदर्शनाचा लाभ घेतला. यावेळी ५०० औषधी रोपटी मोफत वितरित करण्यात आली.

Report on “ The Bard by the Mandovi- Shakespeare Festival”

Title:	The Bard by the Mandovi- Shakespeare Festival
Date and year:	09 September 2017
Venue:	Parvatibai Chowgule College of Arts & Science - Autonomous
Resource person/s:	Various - Assoc. Prof. R.R.Desai, PraneshDessai (Art Director), Ms. Blaxia Alves (Special Education Teacher)
No. of Participants	11 institutes
Objective:	To facilitate the learning of literature in an enjoyable way amongst students who do not study English literature in any form. Also, to give students a platform to creatively express this new knowledge they gain.
Summary of the proceedings	‘The Bard by the Mandovi’ a one day event was organized by the first year English tygers, along with the help of their Second year and Third year seniors as well as the faculty of the Department. This year the eighth edition of this festival was organized on Saturday 09 September 2017. With 11 institutes participating, despite their rescheduled exams, it was houseful! After the formal lighting of the lamp and an encouraging speech by Dr. Sonia F. Da Costa, faculty of the Department and the Principal Dr. N. N. Sawant, the event was declared open. The day ended on a victorious note for Don Bosco Higher Secondary School, Panjim, as they took home the trophy for first place for the second consecutive year. Sharada Mandir School, Miramar won runners up and Our Lady of the Rosary High School, Dona Paula, won second runners up!

Report on “ Pegasus”	
Title:	Pegasus
Date and year:	12 th and 13 th of December, 2017
Venue:	Parvatibai Chowgule College of Arts & Science - Autonomous
Resource person/s:	Various - Ms. Elaine Noronha, Pranesh Dessai (Art Director), Shubhajit Datta (Production Director), Mr. Presley Fernandes (Photography Director) etc
No. of Participants	150 students
Objective:	To extend knowledge of English literature beyond the realm of academics, while giving a platform for students to creatively express their knowledge of Literature. Every year a theme is also introduced, something that they don't study in their regular literature programme. Thus, these students learn something new every year.
Summary of the proceedings	<p>Pegasus – Imagine. Create. Inspire., the biggest inter-collegiate English Literature festival in Goa organized by the students of the Department concluded its tenth year of competitions on the 12th and 13th of December, 2017. Legacy was the theme for this year with 29 events looking back at the best of events over the last 9 years.</p> <p>The winners this year were Team Pennywise, English Dept., Goa University with the runners-up Team Mad hatter, Rosary College- Navelim, followed by Team Valak, MES college, Vasco. Shout out to Dhempe College and Parsekar College of Education coming in a respectable Fourth and Fifth. With over 200 students participating and organizing events, this year capped a successful decade of competitions. A major highlight of the event were the team mascots that went around terrorizing all in the college. The winner was Team Valak, with their depiction of the character from Conjuring. A very special moment in the festival saw organizers of the last ten years gather together to celebrate the occasion. It was a nostalgic gathering of ex-students who reminisced the times when they too were in the throng of organizing and managing the event.</p>

<u>REPORT OF 'EDUCATIONAL OUTREACH PROGRAMME'</u>	
Title:	Summer Educational Outreach Programme, April-May 2017
Date and year:	24 th April 2017 to 10 th May 2017
Venue:	Chowgule College, Margao – Goa
Resource person/s:	Faculty of Physics Department
Organising Committee	Physics Department
No. of Participants	67
Objective:	<ul style="list-style-type: none"> • To instil institutional social responsibility in students by involving them in in-house teaching internship programmes during semester breaks. • This programme is aimed at strengthening the basics of Mathematics and Science of the school children.
Summary of the proceedings	<p>An Educational Outreach Programme was conducted by the Department of Physics from April 24, 2017 to May 10, 2017 at the ParvatibaiChowgule College of Arts and Science, Margao. The objective of the outreach programme was to provide guidance and increase the interest in Mathematics and Science by making learning easy and fun for the students of Govt. Multipurpose High School, Margao. Another objective of this workshop was also to provide an opportunity for some undergraduate students to gain experience in teaching in the form of an iternship. During the programme an attempt was made to give attention to each students in order to address their difficulties in Mathematics and Science and also to enhance their understanding of the subjects.</p> <p>The programme began with a lot of enthusiasm in the students as well as the interns. Their daily schedule started with yoga sessions followed by a lecture in English and Mathematics. After a short refreshment break, students were involved with Do it Yourself Activities which was followed by a lecture on science and the day concluded reporting their experiences and feedback on their diaries.</p>
