Report on "Industry-Academia Lecture Series of Chowgule's Birders Club (CBC)"

CBC organized Industry-Academia Lecture Series in Collaboration with Goa Forest Department, on 09th August 2019. The event was attended by 157 students and teachers. The speakers of the event were Dr. N Palanikanth, Deputy Conservator of Forest (DCF) and Mr. Anand Jadhav, Assistant Conservator of Forest (ACF) of Forest Department, Government of Goa. Dr. N Palanikanth, explained the importance of bird watching in his session 'Birding in Western Ghats', where he explained the association of birds and their habitat, and how adopting bird watching can positively influence a person's mind. He added that watching birds and their habits is a great way of learning to live life of adjustment and harmony. Mr. Anand Jadhav, spoke on 'Birds & Bird watching in Goa'. Chief Guest of the function was Principal, Dr. Nandkumar Sawant. He spoke on the need to have such industry-academia interactions which give students opportunity to directly interact with experts on the field of wildlife.

Report on "DHE Sponsored Certificate Course"

The Department of Zoology of Parvatibai Chowgule College, in association with Directorate of Higher Education, Govt. of Goa conducted a certificate course in "Wildlife Monitoring Techniques" from 05th December to 12th December 2019. The Chief guest of the function was Shri. Subhash Chandra IFS-PCCF, Goa forest Department and Guest of

honour was Shri. Vipul Ghare, Asst. Director (Academics), Directorate of Higher Education (DHE)-Government of Goa. 32 student from four colleges attended the course. The resource persons were eminent officers form Goa Forest department and Goa Bird Conservation Network and Academicians with extensive field based research. The objective of the course was to introduce and train students in wildlife biology with special emphasis on monitoring of flora and fauna. The certificate course was designed to maximize hands on, field-based activities and incorporated interactive teaching-learning methodologies i.e. Cooperative Learning Strategies (CLS) and Problem solving. The course was coordinated by Mr. Stephen Dias and Dr. Nandini Vaz Fernandes and was funded by DHE, Govt. of Goa.

INTERNSHIP REPORT

INTERNSHIP PROGRAMME

(7 november 2019 to 22 november 2019)

Name of Student:-Venday Fernandes Roll No: SU170063

Class: T.Y.Bsc

Number of Hours: 120 hours

Introduction:

It was my immense pleasure to do my internship at the Grace Chemist & Druggist, near post office chaudi, canacona Goa, during November vacation under the guidance of Mr. Edwin Coutinho, head of the above mentioned pharmacy. Apart from medicines, the pharmacy also keeps food supplements, baby products, cosmetics,etc. The pharmacy also has a refrigerator in which the drugs are stored at 8° C. it consists of two employers, male and female including the owner. It opens at 9.00 am and closes at 8.00 pm with a lunch break of one hour from 1.00 pm to 2.00 pm in the afternoon.

Objectives of the internship:

The main objective of the internship programme is to gain practical knowledge to understand the medical chemistry. It also aims for a student to work 120 hours. It helps us to take challenges while doing a job and enhance our skills like time management, better communication, computer skills, understanding various procedures, conducting analysis and helps to prepare for jobs in future. An internship helps to gain skills that can be applied to future jobs. Internships may be paid or unpaid, and they last for not more than 30 days. It also enables to see what the work setting looks like. If a student is not sure sure if a specific careervif right for them , an internship can help them figure that out. In some cases an internship can even lead to a permanent position looking at the interns interest in that particular job and the skills.

Brief overview of actual work done:

During these days, they made us write some medicine names with their active ingredients and their uses. Drugs are classified into various types, namely medicines for pain, fever, inflammation, medicines for cuts and wounds, anti allergic medicines , antacids and digestive medicines, medicines that control blood pressure and blood sugar, food supplements like iron, vitamin, medicines acting on central nervous system and kidney, contraceptive medicines, lexatives and medicines controllind skin infections.In addition, drugs can be in the form of tablets and capsules, powdered form, ointment and creams, inhalation sprays, injections, syrups, drop form and suppository.

Observation, challenges and suggestions:

The employers have to be very patient with each and every customer or patient. They should ensure that they are dispensing medicines of good quality. The patients offer doctors prescriptions which consists doctors name. licence number, qualification, and registration number, patients name and address, diseases info, names of medicine, dosage and duration of medication. The employer should provide them bills along with medicines. They have to keep check on expiry dates of drugs so that they can replace the stock with the help of their batch number. We were asked to distinguish medicines into their various categories. We did most of them but failed in classifying some as we did not had the perfect knowledge about them. This pharmacy had two employers including the owner. There is a dentist next to the pharmacy, so mostly the dentist recommend the patients to get the medicines from this pharmacy so they don't face problems about customers. Since all type of medicines, baby products are available, there were rushes and inspite of being three also it was difficult for them in handling customers. They used to tell me to get a medicine but I being unaware of their placing used to take long time in finding. But as days passed, I improved and everything was fine.

Conclusion :

The main job of a pharmacist is to dispense correct medicine as per doctors prescription, incase if the patient is uneducated or unaware about the intake of medicine then explain them how to take the medicine. It is also important to dispense medicine of good quality. The pharmacy should be kept clean and hygienic. It helps to gain skills of how to communicate with people. It enables confidence while dealing with more people at the same time. This internship helped me to know about more and more medicines. The most important benefit of internship is it gives valuable work experience which cannot be obtained while studying in college. It helped me to learn about my strengths and weaknesses. This internship offered a unique learning opportunity, improvised my mistakes and a first hand experience which will help me in the future for any job.

Date: 28 WOY 2019

CERTIFICATE

This is to certify that Miss Venday Fernandes, student of Parvatibai Chowgule college of Arts and Science, Margao Goa has satisfactorily completed the internship training for 120 hours from 7 November 2019 to 22 November 2019 at Grace Chemist & Druggist, Canacona.

During this period her performance was found to be satisfactory.

Internship Report

Internship Program at:

(HI – TECH)

(7th November-2nd December 2019)

Name of Student:- Harish Kumar.S

Roll No: SU170405

Class: T.Y.Bsc

Number of Hours: 120 hours

Introduction:

I have done my internship in Hi Tech Refrigeration services located inOff: G-8 Emilio Residency, opp. Margao R.T.O. office Arlem – Raia Salcete Goa. Hi - Tech is a private company that is involed in Refrigeration .It is majorly in maintenace, repairing, constulting, Refrigeration machines for past many years. Hi Tech Refrigeration is made up of people of expertise in Electrical Engineering, Metallurgy, Economics and Chemistry .Refrigeration is defined as a process that is involved in cooling of space. Machines like air conditioners and Refrigeraters are widly used in households and industries that require refrigeration. Industries such as Pharmaceutical and Soft drink manufactures rely on refrigeration. Thus our goal is to maintain and repair equipments or machines that are involved in refrigeration.

The maintenace of those machines requires high expertise in metallurgy and electrical engineering. Copper metal is the most common part used in all refigeration machines. Copper pipes are used carriers of the coolent due to its physical proprties. Maintenance and repairing of those pipes require exprtise in metallury and latheing techniques. Electrical work also plays a major part in the machines. Hi tech refrigeration uses these knowledges to help industries and houses.

Objectives/expectations of the internship:

The main objectives of this internship is to get a brief knowledge on how refrigeration works and what are the skills required to repair air conditioners and refrigirators. And what are the tools required to do electrical work and how the refrigerant/coolent works. And also to gain practical knowledge on rules and saftey precautions needed in industries and communication skills to work as an effective team.

Brief overview of actual work done

In the begining I have been given training that includes teachings, vivas and observations. I have studied rules and regulations for saftey management and precautions required to work. I have learned techniques such as welding, latheing, gas filling and electrical work. Equipments that are used for techniques that are mentioned above. Different types of Refrigerants and coolents. Welding, soldering and brazing to connect copper pipes. Usage of different types of spanners and tools.

Testing capacitance of old and reusable capacitors.Usage of testers and meters to record electrical readings in machines . Aquired license to enter Cipla industries situated in Verna, Goa.Visits to Cipla to check the durability of refrigeration machines. Repairing of damaged air conditioners.

Repairing of damaged refrigerators.Circuit diagrams and circuit boards has been taught. Connection of wires and internal meters such as thermostat, light switches. Study of different refrigerant gases such as HCFCs(R22),CFCs(R11), HFCs(R404a).Refilling compreseors with HCFCs(R22).

Dismanteling of compressor to observe different parts of it. Checking on the piston and motor that is used to run the compressor. Using presseure guages to moniter the pressure level of gas in the pipes as the refrigiration was taking place. Checking for any leakages in copper pipes.

Usage of welding torch that runs on oxygen and hydrogen to join copper pipes and to arrest any leakage. Usage of brasing tool to create cavity in pipes to join two pipes together. Filling of R-22 gas into the pipes while maintainig flow and pressure using guages.

Testing for leakages in condensor coil and evaporator coils. Dismanteling air conditioners and observing the parts. Testing for leakages and water levels in air conditioners.

Repairing and refiting compresors in refrigerators. Fixing of capillary tubes. Observations on the working of condenser coils and evaporator coils. Vist to Trek pvt ltd for maintence and repair of industrial refrigerators. Vist to Kolhapur Oxygen and actylene Pvt. ltd. To refill oxygen cylinders used for welding. Achieved experience in this field and became a part of the team and completed the internship with satisfaction.

Observation, challenges and suggestions

Refrigeration plays an important role in daily life it has a major role in pharmaceutical industries due to their importance in maintaining or cooling of reactions that are required to make medicines. In households used to preserve and reduce wastage of food items. In many industries such as softdrink industries it is crucial for them to maintain temperature of water. The challenges were the usage of delicate tools such as welding torch, capacitors and copper pipes.

Different methods are used to combine copper tubes, brazing is a techniques which involves expanding the circumference of one tip without cracking the pipe to join two seperate pipes. Welding is done by compressed welding or soldering. In compressed welding two copper pipes are heated close to melting and compressed to join. In soldering a low melting metal is used to join two pipes. Saftey measures for electrical work is neccesary to prevent injuries or even death. Work had to be done with absolute focus and precautions all the time.

Communication was a big part of the work due to the delicay and complited machines. To work as an effective team I had to understand and suggest different methods to solve problems. Industrial work had to be carried under supervision and had to follow safety regulations.

Repairing or testing of these machines had to be done in an systematic and focused manner. A simple mistake could lead to a huge problem if not done properly. Thus I had to gain practical knowledge in this field of work. I had to use a lot of efforts to do the work without any mistakes.

Conclusions:

I have learnt the basics of physics, engineering and chemistry over the period of my internship. I have also learn to communicate with people and work as an effective team. I have learnt the rules and discipline that you have to maintain in work place. It has been a huge achievement for me to learn all these techniques which can be used for many of my future projects and have gained knowledge about industries.

HI - TECH AIR CONDITION & REFRIGATION SERVICES Off: G-8 Emilio Residency, opp. Margao R.T.O. office Arlem - Raia Salcete Goa Tel: 9657882958 GSTN: 30AEZPR1819K1Z0 Letter of Commendation Date: 2/12/19 Ref: Mr. Mayuresh Rane This is to certify that Mr. Harish Kumar. S, student of Parvatibai Chowgule college of Arts and Science, Margao-Goa, has successfully completed an Internship Training Programme for 120 hours at this M/S Hi Tech Refrigeration from 7/11/19 to 2/12/19. The Intern has carried out, Observations, · Assistance during work, Industrial visits, • Testing air conditioners and refrigerators. During this programme, he worked as a member of our team. He has fulfilled our expectations. We wish him every success. For, Hi Tech Refrigeration

Internship Report

Internship Program at:

(Grace Chemist & Druggist)

(07 November 2019 – 22 November 2019)

Name of Student:- Ekta Fal Desai

Roll No: SU170356

Class: T.Y.Bsc

Number of Hours: 120 hours

Introduction:

It was my immense pleasure to do my internship at the Grace Chemist & Druggist, near post office chaudi, canacona Goa, during November vacation under the guidance of Mr. Edwin Coutinho, head of the above mentioned

pharmacy. Apart from medicines, the pharmacy also keeps food supplements, baby products, cosmetics,etc. The pharmacy also has a refrigerator in which the drugs are stored at 8° C. it consists of two employers, male and female including the owner. It opens at 9.00 am and closes at 8.00 pm with a lunch break of one hour from 1.00 pm to 2.00 pm in the afternoon.

Objectives of the internship:

The main objective of the internship programme is to gain practical knowledge to understand the medical chemistry. It also aims for a student to work 120 hours. It helps us to take challenges while doing a job and enhance our skills like time management, better communication, computer skills, understanding various procedures, conducting analysis and helps to prepare for jobs in future. An internship helps to gain skills that can be applied to future jobs. Internships may be paid or unpaid, and they last for not more than 30 days. It also enables to see what the work setting looks like. If a student is not sure sure if a specific careervif right for them , an internship can help them figure that out. In some cases an internship can even lead to a permanent position looking at the interns interest in that particular job and the skills.

Brief overview of the actual work done

Basically, work to be done at a pharmacy is dispensing of proper medicines, keeping them in proper place, most importantly have basic knowlegde of medicines. Firstly, it was made known to me that all the medicines (syrups, tablets, insulins, drops) were arranged systematically in alphabetical order and hence it was easy to find. When stock had arrived I was told to segregate it and place it in respective shelves. Dispensing of medicines was also done which helped me to learn certain medicines given to certain problems/diseases. During this period I was taught many important things that should be taken care of in a pharmacy as in the scheduled H1 drugs were not to be sold without doctor's prescription. And billing of everyday drug dispensed was necessary and also to keep record of the scheduled drugs dispensed. Records were also maintained of every company that supplied the drugs along with the bath number. Checking of the expired medicines was also done and to keep note of the same for return. And if one sample in stock is defective then the whole stock had to be replaced according to its batch number. Discount was given to the medicines that were purchased in a bulk by the customer. By working in pharmacy I gained knowledge of medicines, learnt managing accounts and also gained basic knowledge of computers.

Observations Challenges and Suggestions

It is necessary for the employers to wear lab coat while in the pharmacy. Every morning they made it point to clean the pharmacy before opening. It was difficult for me to trace the name of medicines on doctor's prescription. Initially it was difficult to find the medicines from the rack and dispense. I was asked to get certain medicines but i was unaware of its placement, it took me a lot of time to locate. In a couple of days i was able to manage well. The medicines to be dispensed were to be shown to the pharmacist before dispensing. When there were too many customers it was difficult to handle. It was cross checked and ensured that proper medicines were supplied to the customers. The patients offer doctors prescriptions which consists doctors name. licence number, qualification, and registration number, patients name and address, diseases info, names of medicine, dosage and duration of medication.

This pharmacy had two employers including the owner. There is a dentist next to the pharmacy, so mostly the dentist recommend the patients to get the medicines from this pharmacy so they don't face problems about customers. Since all type of medicines, baby products are available, there were rushes and inspite of being three also it was difficult for them in handling customers. They used to tell me to get a medicine but I being unaware of their placing used to take long time in finding. But as days passed, I improved and everything was fine.

Conclusion :

The main job of a pharmacist is to dispense correct medicine as per doctors prescription, incase if the patient is uneducated or unaware about the intake of medicine then explain them how to take the medicine. It is also important to dispense medicine of good quality. The pharmacy should be kept clean and hygienic. It helps to gain skills of how to communicate with people. It enables confidence while dealing with more people at the same time. This internship helped me to know about more and more medicines. The most important benefit of internship is it gives valuable work experience which cannot be obtained while studying in college. It helped me to learn about my strengths and weaknesses. This internship offered a unique learning opportunity, improvised my mistakes and a first hand experience which will help me in the future for any job.

Introduction:

I have done my internship in DCI Pharmaceutical Pvt Ltd located in Vidyanagar, margao city. It is a private company which manufactures allopathic drugs. .DCI Pharmaceutical industry is divided into many departments like administration office, packing department, storage department, manufacturing department and utility department and purchase department. The manufacturing department is further divided into two that is the Quality control department and Quality assurance department . The Quality control department is further did into chemical and microbiological department . The vision of the company is to build a globally oriented professionally managed ,socially aware and environmentally conscious organization to provide the best in quality healthcare.

Drugs come in various forms like tablets ,ointments , powders etc. This company synthesizes mostly opthalmics and parentals. Ophthalmics include eye drops and ear drops and parentals include injections. Formulations are very important while synthesizing a drug. They follow the principles of pharmacopoeia which a a publication containing various medicines with their uses and effects. Furthermore there is Indian pharmacopoeia , British pharmacopoeia and United States pharmacopoeia out of which Indian pharmacopoeia is most preferred. Depending upon the batch materials that are ordered received by the purchase department the company gives Purchase order to the manufacturer or supplier. The purchase order is accepted by the manufacturer and is sent to the company in the form of GRN(goods receipt note). Hence goods are received by the stores department and the manufacturing process starts.

Objectives/expectations of the internship:

The main objective of the internship is to grow in the field of chemistry through development of intellectual thinking , understanding how different companies function , experiencing the amount of hard work put up by the employees and learning to put it into practice .The objective of this internship was to complete 120 hours in the company by working there and attain an internship certificate by the company.

Brief overview of actual work done

I had to read the standard operating procedures of each department ,the principles of each department were different, understanding the role of the personnel that were involved in each department starting form the head of the department to the simple worker, everyone had important roles. In the quality assurance department we were asked to pack eye drops and ear drops according to the batch amount they are required, followed by labelling .we were also asked to prepare registers and numbering them for maintaining records for that particular year as well as the next year.Mostly it consisted of materialistic work such as punching of approval and rejection records followed by stamping them. In the stores department ,we were shown various areas like quarantine, dispensing area, sampling booth etc and we had paste verified labels on the goods. In the quality control department we were given sample solutions to be tested and the results were recorded accordingly.

Observation, challenges and suggestions

All the workers were given mandatary lab coats and slippers to be a worn while working in any of the departments. Goods receipt note is generated first Which contains the expiry date ,supplier name, address, manufacturing date and compostions.Samples are first brought to the quality control with under test label and after testing if approved green label is given if rejected red label is printed. Rejected materials are sent back to the supplier whereas the approved ones are stored in quarantine an are used whenever required and depending on the formulation it is used for further processes.

Dispensing is also very important which is the process of weighing .For dispensing checklist is important which means personal cleanliness, to check whether the dispensing booth is clean, mask is clean, dressing is clean. Bulk manufacturing area is where manufacturing formulations are mixed. ingredients are put in the tank and mixed with water. The pH is checked by the In Process quality assurance person who gives line of clearance if everything is in order.

Water is very important in the manufacturing process. Tap water is demineralised to distilled water which inturn heated at high temperatures produces water for injection which means all the organisms are killed .hence water for injection should not contain any organism as it directly injected through intravenous or intramuscular. Bacterial endotoxin test is carried out to check the presence of endotoxin. If any pyrogen is present it may cause death so the production team is informed and flushing of water is carried out to purify the water again. Packing is of two teams primary packing and secondary packing . Primary packing includes nossals , caps and secondary packing included labelling of cartoons. Ampoule is basically a glass container containing the drug that has to be injected into a person's body.Ampoules have to be sterilized .A device called as autoclave is used for the process ofsterilisation. Lupoleen bottles with green caps need to be sterilized. weighing is done by using a balance

Conclusions:

It has also helped me to call understand that everything comes off when you give your best. Sucess is achieved when you work hard.Patience is a key to sucess.

I have learnt about how the company functions and which department performs what functions. Through my internship I have seen that Each department had different exit points and different entry points. It has also improved my communication skills help me overcome my fears of communicating with different people and clearing my doubts which inturn has helped me to understand the subject in a better way.

Internship Report

Internship Program at:

(DCI Pharmaceutical Pvt Ltd)

(7 November - 23 November 2019)

Name of Student:- Aaron Jaques Roll No: SU170280 Class: T.Y.Bsc Number of Hours: 120 hours

Introduction:

I have done my internship in DCI Pharmaceutical Pvt Ltd located in Vidyanagar, margao. DCI Pharmaceutical is a private company that manufacture allopathic medicines. It is majorly in manufacturing of chemicals, liquid injectables, ophthalmics for past many years. DCI Pharmaceutical industry is divided into many departments like administration office, storage department, packing department, manufacturing department and utility department. The manufacturing department is further divided into two that is the Quality control department and Quality assurance department. The Quality control department is further did into chemical and microbiological department. The vision of the company is to build a globally oriented professionally managed, socially aware and environmentally conscious organization to provide the best in quality healthcare. The products prepared in DCI Pharmaceutical have no side effects and are very effective, hygiene preparation. They also export medicines to Nepal, Myanmar, etc. Their purity have attracted many buyers in the global market. The DCI Pharmaceuticals have been awarded a certificate of Good Manufacturing practice (GMP) by world health organization (WHO).

Objectives/expectations of the internship:

The main objective of the internship is to know how medicines are prepared in pharmaceutical companies. To get a brief practical knowledge of medical chemistry and also to take up challenges and gain some knowledge and skills of how the preparation are done, their analysis and to learn many things like packaging, drug composition, procedures, storage and handling of raw and packing materials and to complete 120 hours.

Brief overview of actual work done

Read standard operating procedures (SOP's). Different departments have their different standard operating procedures. Packing ear drops and eye drops and injection as per batch numbers and pasting information label. Entering records in computer like plotting a graph, plotting trends, entering the readings and so on. Arranging the reports accordingly. Writing information about the product in the registers. Writing the details on raw material issue slips and packing material issue slips. Numbering the pages of registers, Labelling and stamping on products, etc.
Observation, challenges and suggestions

When material is received in the facility it's details are entered in security register and it is stored in the quarantine area with Quarantine label on each container. Once the raw material is sampled for testing, the container from which the material is sampled is stamped with sampled stamp on the quarantine label. After sampling the raw material, Undertest label is pasted over quarantine label which is completely hidden. If raw material complies with specifications then approved label is pasted over the undertest label which is again completely hidden.

The raw material is taken to dispensing area through pass box. Dispensing means weighing the raw material and pass box is one of the cleanroom systems, which is used to transfer materials from one side to other side through controlled environment in order to avoid contamination. Bulk manufacturing area is where all the ingredients are mixed in the tank and mixed with water. The pH is checked by quality assurance officer.

Water is very important in the manufacturing process. Tap water is demineralized to distilled water which is heated at high temperature to produce water for injection. It should not contain any micro organisms as it is directly injected through intravenous and intermuscular. Ampoules is a glass container containing drug that has to be injected into the patient. Ampoules have to be sterilized in device called autoclave. Lupoleen bottles are already sterilized. Packing is of two types: primary packing and secondary packing. Primary packing include nossals, caps and secondary packing include cartoons.

All the workers must wear their lab coats and factory slippers and also should be alert and accurate during each process. While using any instrument the instrument should be clean and check whether all the connections are proper. All the employee should follow the entry and exit procedure. No eatables should be taken in the laboratory.

Conclusions:

The internship has been a good experience. I have learnt what is happening in the company and also gained skills of how to communicate with people. I have also learnt to operate the instrument and also learnt that there are different exit and entry procedures. Got to observe and understand how the working of pharmaceutical machinery takes place. I also learned time management and self motivation. TIN : 30661100534 CST No. M/CST/1284 CIN No. U24231GA1975PTC000251 PAN : AAACD5966D

Internship Report Internship Program at:

(Yeshwant chemist and druggist)

(7 November – 23 November 2019)

Name of Student:- Renifa Dsouza Roll No: SU170294 Class: T.Y.Bsc Number of Hours: 120

Introduction:

A pharmacy is a retail shop which provides prescription drugs, the pharmacy, oversees the fulfillment of medical prescriptions and is available to give advice on their offerings . I have done my internship in Yeshwant chemist and druggist. It is a medical store located in canacona market. The pharmacy ensured that the patient's records were well maintained. They prepackaged drug with the knowing of the drugs expiration date. The pharmacy along with the medicines/drugs also had cosmetic products such as perfumes, creames, hair dyes, shampoos, soaps, Colgates, etc. Many tourists used to visit the pharmacy, as the market was close to a tourist spot i. e Palolem beach in canacona, they used to communicate with the pharmacist in order to know about the drug and it's side effects and the pharmacist used to guide them for the same.

While at the pharmacy the major task of apprentice is to handle and deal with the prescriptions and after taking a brief history of patient asking about any past therapy and discussing the prescribed medication in a way to guide the patient properly regarding the use intake and time of medication. I also used to sometimes analyse the prescriptions critically in order to sought out drug to drug interaction under the supervision of the chemist. Most of the times he used to tell me or give me a brief information about drug use and abuse specially antibiotics.

Objectives/expectations of the internship:

The main objective of the internship is to learn some thing more or beyond my main subject, and also to complete the hours and to gain some skills in the field. It gave a brief practicle knowledge of medical chemistry, it also helped me to know whether I have liking towards the job, it also helped me enhance my communication skills towards the customers. It helped me in knowing the different tasks such as when to place a order of medicines.

Brief overview of actual work done

In the pharmacy the pharmacists explained me the system of work how the receipt looks like, how to print the receipt, what we need to control, the system

of ranging the medicines, how to pair medicines with the receipt and required control of prepared treatment for a patient. There is atleast double control, the first one during choosing the right medicine. The last step before delivering the medicine to the patient is the packing. I helped the assistants with arranging received order, and put them at the correct place. I also labelled medicines and helped them with delivering of medicines. When it was necessary, I used the information system for finding the right location . I also controlled the dates of expiration of medicine. Those which have already been expired, we took them off the stocks and each medicine that will expire in the next three months were marked and kept aside. It also helped me enhance my communication skills with people, I also helped the pharmacists with stock checking, issuing the medicines or drugs to the customers, making a note of the drug which are over or less in number , collecting the cash from the customer for the sales and also helping the pharmacists in any work in the pharmacy.

Observations, challenges and suggestions

In this pharmacy the racks were made up of glass and the drugs were arranged in alphabetical order of the company names. Some of the medicines requires specific conditions for storage i.e required to be stored at cool place /low temperature. Yeshwant Chemist and druggist pharmacy ensures the proper storage of such medicines for instance, specific injectibles, Inhalers, insulin, as well as the daily routine items such as juices, etc, have been placed in the refrigerators for adequate storage and maintainance of quality. This pharmacy is providing kor of services to the patients/customers to facilitate them properly. Under the supervision of qualified pharmacist, the staff members as well as the apprentice are providing all medicinal and general services at their best. The purchasing of medicine is either made directly from pharmaceutical company or distributor. Most of the purchasing is made from the authentic and licensed distributors and is supervised by manager or pharmacist.

When there are more number of customers it becomes difficult to handle all the customers at a time. Sometimes it also becomes difficult to recognize the drug written on the receipt due to difficulty in understanding the doctor's handwriting for the sale of the medicine. When the stock comes, if the purchase stock is too much then it becomes difficult to arrange the things as per the rack. Making space for the arrangement of the purchased stock was also an challenge as the space

was not sufficient enough. At the start of my internship I also faced in locating the drugs for dispensing, but the pharmacists helped me in getting to know more about the placement of drugs etc.

Conclusion

In a nutshell, this internship has been a good experience. I can conclude that there have been a lot I have been learnt from my work in pharmacy. I got to learn many things through this internship I got to learn a few basic computer skills such as checking of the availability of the drug in the pharmacy from the computer, printing of the bills. It also enhanced my communication skills. Two main things I have learned is time management skill and self motivation, in facing the customers or patients.

Internship Report

Internship Program at:

(NSA SRA. DOS REMEDIOS MEDICAL STORE)

(8 November – 23 November 2019)

Name of Student:- Chelsea Morais Roll No: SU170304 Class: T.Y.Bsc

Number of Hours: 120

Introduction:

It was my immense pleasure to do my internship at Nossa Senhora Dos Remedios Medical Store opposite St. Joseph Educational Institute, Chandor, Goa; during November vacation under the guidance of Mr. Bulana Perpetua D'souza, head of the above mentioned pharmacy. Apart from medicines, the pharmacy also keeps food supplements, baby products, cosmetics, etc. The pharmacy makes use of a refrigerator in which the drugs are stored at 8° C. The pharmacy is run by two employers, male and female that includes the owner. The pharmacy opens at 9.00 am and closes at 9.00 pm with a lunch break of one hour from 1.00 pm to 2.00 pm in the afternoon.

Objectives of the internship:

The main objective of the internship programme is to gain practical knowledge to understand the medical chemistry. The internship program helped me to take up challenges while performing a duty and enhance our skills such as; time management, better communication, computer skills, understanding various procedures, conducting analysis and help me to prepare for jobs in future. An internship helps to gain skills that can be applied to future jobs. Internships may be paid or unpaid, and they last for not more than 30 days. It also enables to see what the work setting looks like. If a student is not sure if a specific career is right for them. In some cases an internship can even lead to a permanent position looking at the interns interest in that particular job and the skills.

Brief overview of actual work done:

Firstly, it was made known to me that all the medicines were arranged systematically in alphabetical order and hence it was easy to find. When the stock had arrived i was told to segregate it and place it in respective shelves. Dispensing of medicines was also done which helped to learn certain medicines given to certain diseases. Records were also maintained of every company that supplied the drugs. Checking of the expired medicines was also done and to keep note of the same for return. I had a very good experience working at the pharmacy as it satisfies my point of interest. It helped me gain a lot of practical knowledge about the course I've opted for. I had to arrange medicines as per their correct order along with their production and expiry dates of the same. The medicines which are very close to expiry and the expired ones are also discarded.

Observation, challenges and suggestions:

The employers have to be very patient with each and every customer or patient. It is necessary for the employers to wear lab coat while in the pharmacy. Every morning they made it point to clean the pharmacy before opening. They should ensure that they are dispensing medicines of good quality. The patients offer doctors prescriptions which consists doctors name. licence number, qualification, and registration number, patients name and address, diseases info, names of medicine, dosage and duration of medication. The employer should provide them bills along with medicines. They have to keep check on expiry dates of drugs so that they can replace the stock with the help of their batch number. I was asked to distinguish medicines as there were many shelves with different types of medications. I was asked to get certain medicines but as I was unaware of its placement, it took me a while to find them. When there was too many customers it was difficult to handle . It was cross checked and ensured that proper medicines were supplied to the customers

Conclusion :

The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medication, and it also includes more modern services related to patient care, incase if the patient is uneducated or unaware about the intake of medicine then explain them how to take the medicine. It is also important to dispense medicine of good quality. The pharmacy should be kept clean and hygienic. It helps to gain skills of how to communicate with people. It enables confidence while dealing with more people at the same time. This internship helped me to know about more and more medicines. The most important benefit of internship is it gives valuable work experience which cannot be obtained while studying in college. It helped me to learn about my strengths and weaknesses. This internship offered a unique learning opportunity, improvised my mistakes and a first hand experience which will help me in the future for any job

Internship

Report

Internship Program at:

(Cure It pharmacy raia)

7th September 2019 -24th September 2019

Name of Student: Mansi naik

Roll No: Su170070

Class: T.Y.Bsc

Number of Hours: 120 hours

Introduction

Pharmacy is the science of preparing and depensing drugs and providing other clinical services. Pharmacists, therefore, are the experts on drug therapy and are the primary health professionals who optimize the use of medication for the benefit of the patients. Cure it pharmacy is located in dagwal raia. It is owned by Ms valisa goes. Under her guidance the pharmacy is doing very well. It has been started around 5 years back and is now become the most popular pharmacy in the dagwal ward.

It was my pleasure working in cure it pharmacy as I got to learn and experience about the technique and how to deal with the drugs.

Objective of the internship

The main objective of this internship is that the individual gains complete knowledge in pharmaceutical chemistry and to manage the drugs. Also completion of the 120 hours gives the individual a hand held experience with Management of different types of medicines. The intern gets to know about the different classification of drugs and to keep a record of each one of them. Along with this the candidat gets a chance to improve their communication skills as well. An important part of this internship is to learn and practice the basic custome service skills.

Brief overview of actual work done.

During this span of 120 hours I got an opportunity to learn about the different types of medicines. The expiry dates were checked and the expired ones were discarded. I als improved my computer skills and learned about the method used for billing purpose. billing records were strictly updated before closing down everyday. I came across the different brand which are available in the market. Records were maintained of the companies which supplied drugs. The new stock was arranged according

to their brand names. One of the most important aspects of this internship was also how to communicate with the customers and to be quick in service. This internship helped me to be more quick in my work and enhanced my practical knowledge and I gained more knowledge about medicinal chemistry.

Observations challenges and suggestion.

One should be very alert while working in the pharmacy. There should be no negligence in dispensing the medicines. The patients carry with them the prescription and it is the duty of the pharmacist to give the exact dose and there should be no mistake in dispensing. Discarding of expired medicine must be ensured. Hygiene is an extremely important point. I was made to check whether all the syrups and other medicines were well packaged and arranged on the shelves and there was confusion to find them. remembering the brand names was difficult for me but den slowly I learned to deal with. I also learned more about systematic management skills. Sometimes when there were to many customers it was difficult to handle and we had to be very patient and cross-check and ensure that th right medicines are being dispensed.

Conclusion

Working at cure it pharmacy was very beneficial as it helped me gain a lot of knowledge about the sales and management of medicines. This internship enhanced my communication skills. Incase when some patients were unaware of the dosage and intake then i had to explain them how to take the medicine. This made me more patient and aslo learn more about the dosage of different medicine I got an opportunity to work with experience people and under their guidance I improvised and had a good experience which will help me in future.

Internship Report

Internship program at :

(Cure It Chemist and Druggist)

(9th November to 23rd November)

Name of the student : Mcgnicia Mcsweeny Fernandes

Roll no.: SU170074

Class : T.Y.Bsc

Number of hours : 120 hours

Introduction

Cure It Druggist and Chemist is located in Raia. It includes different types of medicines for all ages. They also sell other pharmaceutical products. They give primary medical services like checking of blood pressure and diabetes. It is ensured by the pharmacist that the drug records are well maintained.

Objectives / Expectations of the internship

The motive of this internship was to gain knowledge beyond my major subject that is chemistry. I chose to do my Internship at a pharmacy so that I can gain knowledge of different medicines and enhance my skills. While you might have an idea about what a job is like but you won't know how it is until you actually perform at that place and accordingly conclude wether it was the same what i thought. It was essentially important to improve myself and get a little experience of different challenges. Doing internship can also lead you to a permanent job, if you be good at it.

Brief overview of the actual work done

Basically, work to be done at a pharmacy is dispensing of proper medicines, keeping them in proper place, most importantly have basic knowlegde of medicines. Firstly, it was made known to me that all the medicines (syrups, tablets, insulins, drops) were arranged systematically in alphabetical order and hence it was easy to find. When stock had arrived I was told to segregate it and place it in respective shelves. Dispensing of medicines was also done which helped me to learn certain medicines given to certain problems/diseases.

During this period I was taught many important things that should be taken care of in a pharmacy as in the scheduled H1 drugs were not to be sold without doctor's prescription.

And billing of everyday drug dispensed was necessary and also to keep record of the scheduled drugs dispensed. Records were also maintained of every company that supplied the drugs along with the bath number. Checking of the expired medicines was also done and to keep note of the same for return. And if one sample in stock is defective then the whole stock had to be replaced according to its batch number. Discount was given to the medicines that were purchased in a bulk by the customer. By working in pharmacy I gained knowledge of medicines, learnt managing accounts and also gained basic knowledge of computers.

Observations Challenges and Suggestions

It is necessary for the employers to wear lab coat while in the pharmacy. Every morning they made it point to clean the pharmacy before opening. It was difficult for me to trace the name of medicines on doctor's prescription. Initially it was difficult to find the medicines from the rack and dispense. I was asked to get certain medicines but i was unaware of its placement, it took me a lot of time to locate. In a couple of days i was able to manage well. The medicines to be dispensed were to be shown to the pharmacist before dispensing. When there were too many customers it was difficult to handle. It was cross checked and ensured that proper medicines were supplied to the customers.

Conclusion

I got pharmacy experience from dispensing of medicines to billing of scheduled H1 drugs. It was also good to enhance my communication skills. I learnt that it is important to handle the customers with patience. I also got an opportunity to work with experienced people which will help me in the future. It also helped me revise and improve my computer knowledge and skills. It helped me to be punctual at every work I do. It helped me improvise my mistakes.

TO WHOMSOEVER IT MAY CONCERN

This is to certify that Ms. Vaibhavi Shetye of Parvatibai Chowgule College of Arts and Science Autonomous, Goa, has successfully completed her summer internship at Lupin Goa starting from 13th November 2019 to 2nd December 2019. This training was a part of the curriculum of Bachelor of Science.

During the training, she displayed great enthusiasm and interest in learning the various functional as well as operational aspects of the Plant.

It was heartening to see her showing such zeal of learning despite the fast pace we had set.

We wish all the success in her professional as well as personal growth. Please do not hesitate to contact the undersigned for any further clarifications.

For LUPIN LIMITED.

Dear Devrai Revadkar,

With reference to the discussions that we had with you, we are pleased to appoint you as **Software Intern** (Developer) in Infipre IT Services OPC Pvt. Ltd. (Henceforth referred to as the Company) We trust that your knowledge, skills and experience will be among our most valuable assets. Your date of joining is set as 02/12/2019.

You will be on internship cum probation of 6 months. Your monthly total remuneration/stipend will be ₹5,000.00 - inclusive of all allowances and company contributions during internship. Out of this 4,000.00 will be fixed pay and 1,000.00 will be performance pay. Performance Pay will be paid only after successful completion of the assigned project at the end of Internship. If the assigned project is not completed successfully then the performance pays won't be paid out.

In case you perform exceptionally well as per the industry standards then you will be absorbed into the company before your internship completion. In such a case, your salary will be incremented.

Your appointment will be governed by the terms and conditions of employment presented in Annexure A and by the rules and regulations in vogue and those that may change from time to time.

By accepting the offer, you agree to the terms and conditions. You also commit to stay with the company for the full internship period.

Yours sincerely

For Infipre IT Services (OPC) Pvt. Ltd.

Yatin Sanjeev Kanekar

CEO

I have read, understood and agreed to the terms and conditions as set forth in this appointment letter

Internship Report

Internship Program at:

(Om Enterprises Stationary)

Date (9th 2019 to 20th December 2019)

Name of Student: Ivy D'silva Roll No: AU160141 Class and Subject: TYBA (Sociology) Number of Hours completed: 120hours
Om Enterprise, It is a stationary shop in Nagmoddem, Navelim which along with the stationary items includes gifts, the owner of Om Enterprise deals with dish recharge, mobile recharging and providing new simcards along with xerox. Lamination is also available. Apart from that he helps customers with any online queries.

The main reason that I chose this Enterprise was that it was near my place of residence and I also like to do that kind of work, like xerox, scanning and lamination. To improve my typing skills along with helping customers with their documents. I wanted to gain knowledge on how to interact with customers and learn how to efficiently deal with a lot of customers simultaneously.

The internship commenced on 9 November 2019 to 2 December 2019. The tasks that were undertaken by me included:

To cooperate with the customers and to manage the order and updates of materials on the computer. I saw how the salesman had to show different materialsof stationary for children and adults. It was totally different to those who work in office or in a school.

As an intern, I have done my internship from Om Enterprise for a few months and for me one month was not sufficient time to learn the different aspects of managing a stationary shop. The challenges I faced was when the customer came with different things like design print and also to procure some information online for their kids assignments in the schools and colleges. It was difficult deal with the technical issues at times.

Responsible for managing daily activities in the store, ensures that the store facility is in tip top shape and conducive enough to welcome customers. Check stocks, placing and expediting orders evaluating new products. Controls the sales floor inventory, ensures that goods and products are properly arranged. Supervise the entire sales staff and workforce.

It was great opportunity to work in that store and learn different things, It was a friendly environment in Om Enterprises, Overall as an intern, I have tried my level best to cover and learn some of the essential activities from my first-hand experience. But doing this internship finally, I have strictly followed the Om Enterprise stationary terms and conditions that no credit and discipline as per the owner norms.

LETTER OF COMMENDATION

Ref: HOS/EPA/2019/1846

Date:29.4.19

Subject: Successful completion of Internship.

This is to certify that Mr. Luke Bossuet Sequeira Vaz, a student of ParVathibai Chowgule College of Arts and Science, Margoa, Goa, has successfully completed 120 hours of Internship at House of Safety an ISO 9001:15 certified company based in Sancoale, Goa. He has done his internship in two phases: first from 1st Nov 2018 to 4th Dec 2018 and then from 17th April to 29th April 2019.

The following jobs had been assigned to him during the duration of his Internship

- The painting, filling, emptying and the servicing of fire extinguishers.
- The servicing, inflation and deflation of inflatable Life Rafts
- To study about various safety devices like flares, rockets, immersion suits, life jackets, fire alarms, etc.
- To learn the basics of Business management skills.

He has completed all these jobs to the best of his ability and has learned a lot from them. During his duration as an intern, he has shown a great zeal for technical work and to share his ideas with the management. His technical skills have vastly improved. During this program, he has worked as a member of our team and has fulfilled our expectations.

We wish him every success in his-future endeavors Authorized signatory (Benjamin Fernandes) Manager operations

TO WHOMESOEVER IT MAY CONCERN

This is to certify that **Mr. Shynerl Mascarenhas** has done his internship in **Database Administration** at BTS Productions, Goa from 11th November 2019 to 11th December 2019.

He has worked on a project titled 'Goa on cycle'. This web-based project was aimed towards boosting the Goan-Eco tourism, wherein customers can book a cycle trip online and explore the inner villages of Goa. As part of this project, he was given the responsibility to develop database structure for a small module using technologies like MongoDB etc.

During the internship he demonstrated good logical skills with a self-motivated attitude to learn new things. His performance exceeded expectations and was able to complete the given task on time.

We wish him all the best for his future endeavours.

Internship Report

Internship Program at:

Juned cloth and tailors margao goa

Date: -01 Feb to 2 March 2020

Name of Student: musaib ahmed

Roll No: AU180087

Class and Subject: Sociology

Number of Hours completed: 120+

Introduction:

Juned cloth and tailors is one of the best designing suit and garment store located in margao near harri mandir kurtarkar shopping centre it is known for its elegance style and best quality in ggoa. I have been working as a sales manager and a designer in the store. It was a very good experience in the store as I was able to learn how to handle the customers and also know what really the customer wanted.

Brief overview of actual work done:

I was the designer and the sales manager in the Juned cloth and tailors designing studio. It was a very good experience as I have learnt to handle the customers and learnt what really the customers wanted the owner thought me how to handle the customers and also how to shoe them the clothes how to fix the rate and how to know what would suit the customer the best and the most important is the customer should be happy with the service

Observation, challenges

The major challenge that I have faced during my internship was, at the beginning I didn't knew how to handle the customers I literally would get afraid when the customers used to come in the shop and I used to get confused and show them something else and also sometimes used to tell then more money from the actual price and also sometimes lesss. The second challenge which I faced was the measurement and designing buhhh after some days the owner thought me how to take a perfect measurement and also how to design the clothes. That was an amazing experience for me

Conclusions:

• I got to know the fashion trend in today's generation and got a glimpse about the fashion

world by working at Juned cloth and tailors

- It really helped me to how to open up with the people and how to handle the new customers
- It also helped me to understand people like what people really wanted eat will suit upon them or which colour which cloth etc
- This experience will help me a lot in the future

This is to certify that master musaib Ahmed student of parwatibai chowgule college of arts and science margao has successfully completed the internship training programme of 120 hours at our designing studio Juned cloth and tailors as a designer and sales manager From 1st February to 2nd of March We have found him very hard working and a skilled student who work very hard for his goals he is a very responsible and a hard working person and one the best in our team We take this opportunity to thank him for his contribution We the whole team of Juned cloth and tailors wish him all the best for his future

(Vidhur H. Fadte) Secretary V.P. Cansaulim Arossim Cuelim

Internship Report

Internship programme at :

(village panchayat of Cansaulim, Arossim, Quelim)

Date :November- December 2019

Name :Fariyal Bepari Roll no : AU180071 Class : SYBA Number of hours :120 Double Major – Sociology / History

Introduction

The internship programme which was conducted from 2^{nd} November to 26^{th} November this internship was conducted at the village panchayat of Cansaulim , Arrosim , Quelim mormugao Goa . I started working there as a intern from 2^{nd} November to 26^{th} November . My basic duty as intern was to assist the clerk Of the village panchayat and to do the duties assigned by them .

Objective / Expectation of the internship

To enhance the skills in work set up such as how to work under superior authority ,with unity and build up self confidence and personal growth .

Brief overview of actual work done

The following activities were conducted :

- Typing
- Inward and outward
- Demand and collection
- Calculation of cash book
- Issues of certificates
- House tax register
- Calculation of house tax
- Birth and death registration

Observation, challenges and suggestions

The internship program was conducted at the village panchayat of Cansaulim, Arrosim, Quelim . The aim was to get a good working experience in a formal set up .There were various things which were taught to me as an inter .As an intern I got to learn a lot of things which I was even not familiar off such the entire process of issuesing the birth certificate, residence certificate and income certificate and then to take the signature of the concerned authorities such as sarpanch and the secretary. Taking off signatures on the issued certificate takes more time as sometimes they were not available. Through this internship programme I got an opportunity to know how an office function. Every one was punctual and dedicated towards their work .And did their work very systematically .As an intern I was assigned with different type of work which I had never done .I was assigned to do typing, then issuesing the certificates . During the initial days I had difficulty but later on I learned and enjoyed doing that work. The head clerk assisted me during the entire internship process even explained everything very nicely .All the members working in the Panchayat were very good, helpful supportive and kind I enjoyed working with them. During this process I learned that patience is very important . Sometimes the people were very rude and aggressive but we must be cool and calm despite of their unwanted behavior towards them . I got to know a lot of new people. I also observed that there were different types of people who visited the panchayat and the employees had to deal with them in a different way .Overall it was a great work experience.

Conclusion

I would like to conclude that it was a great learning work experience .First time I got to know how to work in a office set up . I also learnt a lots of things during this entire internship process which will benefit me in my future course of time .
