# Design & Modify the Form by adding multiple section, theme and different type of questions.
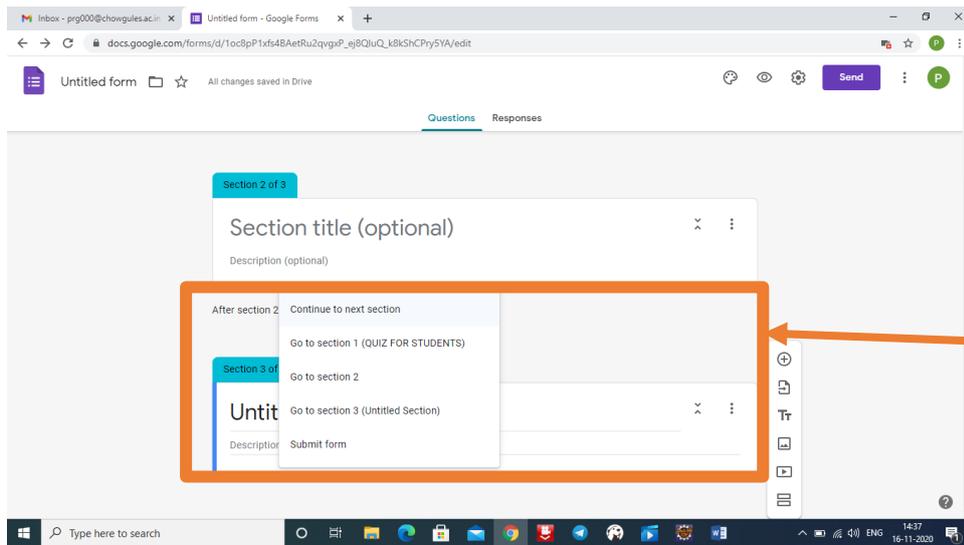

1] Steps to edit and add section is described below. (Let's create 3 section and name them)

Click or tap on add section option which will create new section

Enter title and description for each section

Below each section you will find one option that allows you to select which section to proceed after completing a particular section.
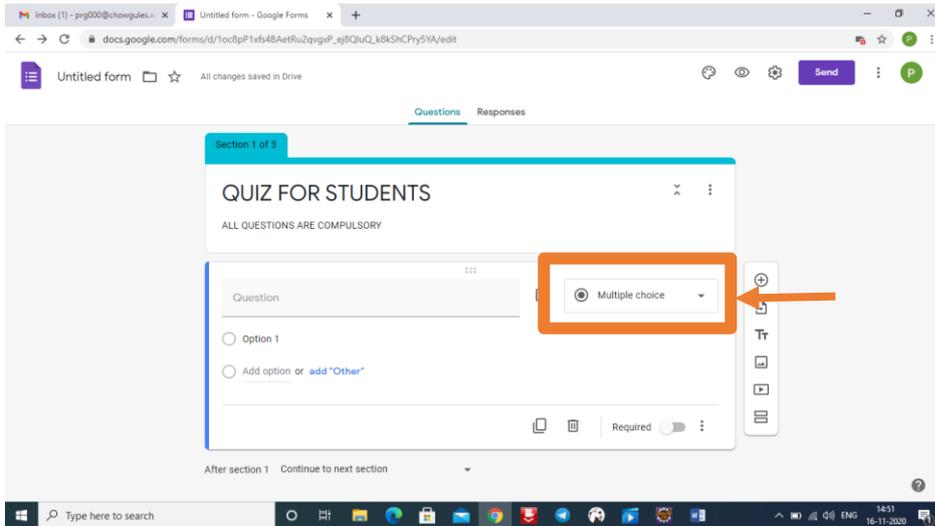

2] Steps to create questions

Using Google Form you are able to create various type of questions listed below:

- ✓ Short answer
- ✓ Paragraph
- ✓ Multiple choice
- ✓ Checkboxes
- ✓ Dropdown
- ✓ File upload
- ✓ Linear scale
- ✓ Multiple choice grid
- ✓ Checkbox grid
- ✓ Date
- ✓ Time

Click or tap on add question option to create a new question.

Here you can select the type of question that you want to ask.

Example: You can choose short answer question or Checkbox as per your requirement.

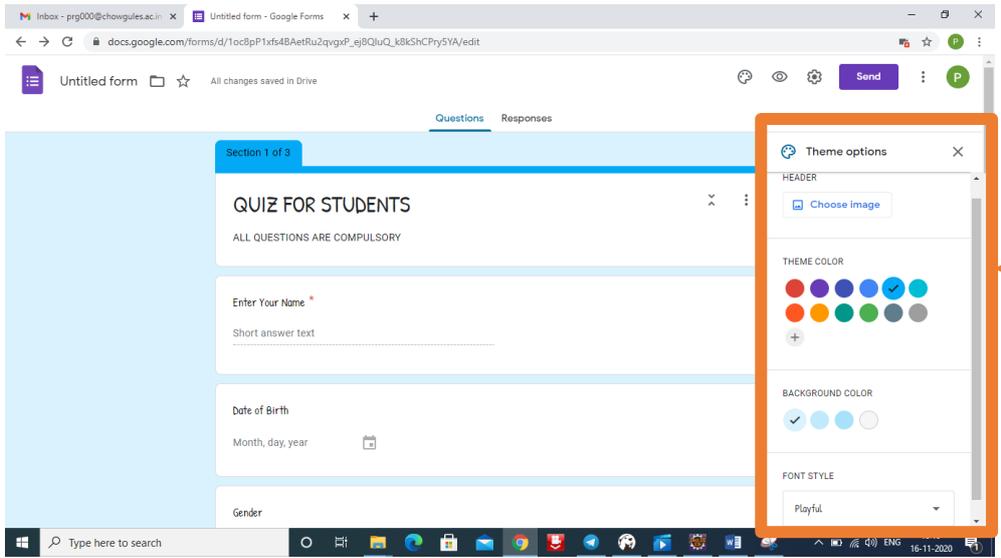

Incase if you want to make a particular question compulsory then you have to enable the required option.

3] Steps to change the theme and preview the form.

Tap on this option

Using theme option you may change the background color, Font style or even select image as background.

Tap on the "eye" like option to preview your designed Form
